*Sonos Imaging Opens First Location in Prattville
-First of Its Kind in Alabama and the U.S.-*

Prattville, AL– Sonos Imaging has now opened its doors to the River Region community. The MRI facility is the first of its kind in Alabama and is home to the Optima MR450w 1.5T MR system, which is designed to help maximize comfort and technology.

Unlike any other MRI facility in the country, Sonos Imaging is pleased to offer a spa-like setting in a first class facility. The office is located at 2715 Legends Parkway in Prattville, Alabama next to Lemak Health and across from Home Depot.

“We believe that we have a location that provides the local community convenient access to the best imaging technology in the country,” said Wendell Gibson, VP of Development, Sonos Imaging. “Housing the most state-of-the-art equipment available, our radiologists are equipped with the resources they need while making their patients feel at ease.”

Because diagnostic testing is one of the most important clinical tools available to physicians and patients to help lead to a positive outcome, Sonos Imaging radiologists will be able to provide patient care through Medical Resonance Imaging (MRI). Sonos Board-Certified Radiologists Dr. S. Dale Brawner, Dr. Anne B. DeAtkine, Dr. Patrick D. Grant, and Dr. Ben G. McDaniel Jr. will provide unsurpassed care to patients of all ages.

Sonos Imaging was created to be a luxury setting for patients. There are no waiting rooms. Instead, patients have access to their own individual lounges, which have en-suite changing rooms, a desk, Wi-Fi, and television. These lounges are meant to be a restful place for the patients, their families, and their guests.

The MRI Suite is open and bright and with the latest and largest technology from GE, Sonos Imaging will provide the most comfortable environment possible to each patient. The suite is oriented such that it is filled with natural light on two sides, allowing for a comfortable and open environment for patients.

Sonos Imaging will be expanding across the state, opening in Birmingham and the surrounding metro area later this year and in early 2017.

About Sonos Imaging

Sonos Imaging is an MRI facility that meets the imaging needs of patients in a spa-like setting. Comfort and experience is our number one priority. To find out more, check out our website at www.sonosimaging.com or call 334-676-4520.
